Dear Mark,

I think but I'm not sure, being a bit fuzzy today, that I've sent you some records disclosed to Mark Allen reflecting the fact that the FBI lies in at least FOIA litigation in always swearing that ticklers are routinely destroyed after a matter of day, as Phillips and others have sworn in all my cases. I think that the reason I did is because it might be relevant in cases you handle, FOIA and other. What I have in mind by other is a case you do not have, Paul Robeson's son. Or the Rosenberg case, etc.

There is another toutine lie, that the ticklers contain only carbons of what is in the disclosed main files. A classic case of this in the so-called Long tickler, in my King suit, clearly a political tickler loaded with what could be used to defame, etc. Misused, I should say. This tickler disclosed wiretapping to me, and it was in a bank robbery file, not a main assassination file. Etc. etc. etc. It also happens, it may interest you to know, that permission to wiretap had been requested, Ramsey Clark did not approve, and much later, after his wiretapping, Hoover write an indignant withdrawal to Clark.

Enclosed is a copy of a memo on some of the copies of records reflecting the existence of ticklers after as much as 20 years that I'm sending to Jim. If at some point in the future this is of interest to you, Mark Allen has all of it because he is sending me only some of it.

Best wishes,
